FOR IMMEDIATE RELEASE: Junior Flight Academy (JFA) Announces Launch of New Online Courses for High School Students in a Phased Rollout, Beginning this Summer.

Los Angeles, CA, June 6, 2023 – The Junior Flight Academy (JFA), a leading education provider committed to delivering exceptional science and technology learning experiences, is thrilled to unveil its latest initiative: an extensive range of online courses designed for students from kindergarten to 12th grade. This innovative program aims to provide comprehensive and engaging educational opportunities that showcase aeronautical science and technology and caters to the evolving needs of today's students. The phased rollout of these courses will commence in the summer of 2023, allowing high school students to embark on a transformative learning journey from the comfort of their homes.

With the rapid advancements in technology and the growing demand for flexible learning options, JFA recognizes the importance of providing high-quality online education. These newly launched online courses have been meticulously crafted by a team of experienced educators and subject matter experts. They are designed to captivate young minds, promote interactive learning, and foster critical thinking skills.

Starting from the summer of 2023, the Junior Flight Academy (JFA) will gradually introduce new online courses to students across the country as well as many international students. The phased rollout will allow JFA to ensure a seamless transition for students, parents, and educators, providing ample time for feedback and refinement.

The online courses offered by JFA cover a wide array of subjects, including science, technology, engineering, arts, mathematics (STEAM) and more. Each course follows a carefully structured curriculum that aligns with national education standards, ensuring that students receive a well-rounded and comprehensive education. Leveraging the power of technology and strategic partnerships like the Air Force Flight Test Foundation at Edwards, JFA's online courses feature interactive multimedia content, engaging videos, virtual simulations, and real-time assessments, creating an immersive and dynamic learning environment.

Furthermore, JFA's online courses currently serve to reinforce existing STEAM related curriculums that partner schools already teach or manage. Some of our partner schools incorporate adaptive learning technologies that personalize the educational experience for each student. By analyzing individual learning patterns and preferences, the JFA courses will adapt to students' needs, offering personalized guidance and support. We are currently working with our partner schools and districts on future tailored approach to learning that fosters student engagement, boosts academic performance, and instills a lifelong love for learning.

To ensure a seamless experience for both students and parents, JFA has developed a user-friendly online platform that provides easy access to course materials, progress tracking tools, and interactive forums for collaboration and discussion. Moreover, the courses are designed to be flexible, allowing students to learn at their own pace and enabling parents to actively participate in their child's education.

"We are thrilled to launch our new online courses for high school students this summer," said Dr. Michael D. Falkow, PMP, Senior Advisor, Academic Programs. "With these courses, we aim to empower students to reach their full potential, inspire their curiosity, and equip them with the skills they need for success in the 21st century. Our phased rollout ensures that we can deliver the best

possible learning experience while addressing the unique requirements of each grade level. We are excited to embark on this journey with students, parents, and educators alike."

Junior Flight Academy's online courses for students are set to redefine the way education is delivered, making quality education accessible and engaging for all. JFA is a renowned education provider dedicated to offering exceptional learning experiences to students of all ages. With a commitment to innovation and excellence, JFA strives to transform education by harnessing technology and personalized approaches to meet the evolving needs of learners worldwide.

#####

BACKGROUND

About **Junior Flight Academy (JFA)**: Junior Flight Academy is a new online educational platform offering a comprehensive aviation and technology curriculum for students (K – 12). In the next several months, new courses for more students in other grades will be coming online. Some courses will also be translated into other languages to allow even more students access to this amazing content. The Junior Flight Academy is committed to promoting STEAM-focused education, encouraging critical thinking, and fostering a love for aviation and technology among all students. This partnership represents a significant step toward preparing students for future success in the ever-evolving world of aviation and technology.

By integrating science, technology, engineering, arts, and mathematics, the academy aims to inspire and prepare students for successful careers in the aviation and technology industries. To learn more about JFA, visit <https://JuniorFlightAcademy.com>.
